

COMMUNITY-POT-LOTS, for planting your own communities.

Each year, more of you Ryerson Customers discover that you can grow your own community pots of fine hybrid seedlings, without investing in whole flasks of each cross. They fly to you, AIR MAIL PREPAID, including potting mix and fungicide. Follow simple planting instructions on Page D.

Single COMMUNITY-POT-LOT of 25 seedlings (any individual cross).....\$ 5.00
Any SIX community-pot-lots (your choice of any six crosses).....\$25.00
NO MIXED LOTS, PLEASE. MINIMUM ORDER: 25 seedlings of one cross.

#Ph-22 PHAL. CHIEFTAIN, SAN-MAR-KEN X PHAL. CHIEFTAIN, LA PALOMA - This cross of two of the finest, roundest and most perfectly formed Phalaenopsis, PURE WHITE, for showers of blooms in 36 months, if grown according to suggestions on Page N.

#Ph-23 PHAL. CHIEFTAIN X P. DR. HENRY EVERSOLE - Another fine White Phal. cross.

#Ph-25 PHAL. DORIS VAR PINK CLOUD X P. DORIS X P. ELINOR - Everyone who already has plenty of White Phalaenopsis is looking for the newer PINK crosses - delicate, solid pink color, with form and substance equalling that of the above Whites.

#73-V V. SUAVIS X V. MERRILLII X V. ELLEN NOA - Strong growing strap-leaf Vandas in the popular yellow and brown shades. Most should be pale greenish-yellow with russet-brown markings. Fine shape and heavy, long lasting texture. Produce clusters of eight or more flowers several times per year. Read Pages Q and V on Vandas.

#765 C. DUSABEL ALBA X LC CANHAMIANA ALBA - Grand White-Colored-Lip cross for June.

#777 C. ISORA NADALINA X BC HARTLAND - Fine medium to dark red-lavender Brasso cross for Winter or twice yearly.

#783 LC HELEN WILMER, VICTORY X BC HARTLAND - Extra fine, dark, late Winter or twice yearly Blc's of grand form and crisp, heavy texture.

#786 BC PLUTO (C. Granulosa x B. Digbyana) - For those who like novelties, try this lime green cluster with fringed lips. Spring.

#792 BLC GOLDEN MYTH X C. FORBESEII, AUREA - Small, brilliant, very heavy textured golden yellow bi-foliate clusters expected. Winter or twice yearly.

#794 BLC GOLDEN MYTH VAR BUTTERCUP X C. EDITHAE #1 - This Golden Myth is the richest yellow I've ever seen in an Orchid, and has no other color, even in the lip. Doubt if even the pure White Edithae will make the offspring "washed out". Some may be peach colored. Winter-Spring.

#796 LC CYNTHIA X LC NEW YORK X BLC GOLDEN MYTH - Yellow to apricot colored flowers with bright, rose-purple lips, topped by orange, are expected from this cross.

#800 BLC MARION RYERSON (Lc Linnaeus T. Savage X Bc Hartland) - Those of you who are always asking for a top quality Blc Marion Ryerson to add to your collection, but yell your ears off when you hear the price! can now grow your own. This is a re-make of the cross, using the same, identical parents. So, your chance of producing a prize winner is as good as the next fellow's.

DANIEL RYERSON, BOX 805, HOMESTEAD, FLA.

DATE _____
